EDUCATION

Dedan Kimathi University of Technology — **Nyeri, Kenya**
B.Sc. in Computer Science — *Expected Graduation, April 2027*

- **Concentrations:** Software Engineering, Artificial Intelligence
- **Related Coursework:** Data Structures & Algorithms, Design & Analysis of Algorithms, Object-Oriented Programming, Software Engineering, Artificial Intelligence, Computer Organization & Programming

EXPERIENCE

Colkitts Capital — **Remote**
Software Engineer & Cloud Engineer — *Jan 2026 – Current*

- Built and maintained backend systems for the company's applications, along with development and deployment pipelines on AWS
- Designed and built AI agents using the OpenClaw agent framework
- Automated business workflows with n8n, cutting out repetitive manual steps across tools

Freelancer.com & Independent Clients — **Remote**
Freelance Software Developer — *2022 – Current*

- Developed Python Telegram bots that automate tasks and handle real-time user interaction, integrating third-party APIs with custom logic
- Built and maintained Django web applications with RESTful APIs, authentication, and relational database models
- Developed responsive React interfaces using component-based architecture and state management

Independent Clients — **Remote**
Freelance Graphic & UI Designer — *2022 – Current*

- Designed wireframes and interactive UI prototypes in Figma to speed up product development
- Created and edited branding graphics in Adobe Photoshop for digital marketing projects

PROJECTS

OpenClaw Email Agent

- Built an AI agent with OpenClaw that reads incoming emails and classifies each one by category
- Designed reply rules for every category so the agent writes and sends the right response automatically, removing manual inbox triage

Django Quant Platform

- Developed a Django platform for quantitative trading research that brings market data, strategy testing, and portfolio tracking into one system
- Built a market data pipeline that collects price data from external sources and stores it for analysis
- Implemented a backtesting engine that evaluates trading strategies against historical data, with portfolio tracking for positions, profit and loss, and performance metrics

WhatsApp Automation Tool

- Built a WhatsApp automation system with n8n workflows that answers customer messages instantly
- Automated outbound notifications such as reminders and status updates to customers
- Captured new leads and customer requests from chats so every enquiry is recorded for follow-up

SwiftGo — **Nairobi, Kenya**

- Developed a Django platform that connects retailers with customers, streamlining product discovery and communication
- Implemented secure APIs and efficient database management behind user-friendly interfaces, improving customer engagement and retailer visibility

Healthtrak — **Nyeri, Kenya**

- Built a PHP and MySQL web platform that streamlines healthcare workflows for doctors and patients
- Enabled doctors to manage appointments, prescriptions, and patient progress, and gave patients a portal to book appointments, view prescriptions, and message their providers

SKILLS

Programming: Python, JavaScript, Java, PHP, C, SQL, HTML/CSS
Frameworks: Django, React
Cloud & Automation: AWS, OpenClaw (AI agents), n8n
Tools: Git, Linux, VS Code, Visual Studio, Jupyter Notebook, Figma, Adobe Photoshop, Agile
